THE FIREPLACE

IT INVITES YOU TO RELAX AND
CALM DOWN IN THE HECTIC OF DAILY LIFE

It creates a pleasant atmosphere at family celebrations or gatherings of friends. That's why we think it's essential that it matches the style of the house. This is facilitated by our fireplace surrounds, which come in three main styles so that everyone can find the perfect match to suit their ideas.

THE MAGIC OF
FIRE IN YOUR
HOME

THE MODERN FIREPLACE SURROUNDS

The modern style is characterized by simple, clean lines, geometric shapes, minimal use of decoration and color, and an absence of clutter and frills. Interiors with straight, elegant lines and sometimes with geometric shapes suit the modern style, and our present-day style fireplace surrounds are a perfect match for such interiors.

CLASSIC FIREPLACE SURROUNDS

Fireplace surrounds with classic features exude an eternal elegance and elusive glamour with their dignified, patinated beauty. They are the true jewels of a room, creating a cosy and elegant atmosphere. The wall space around the panelling should not be neglected either, as it provides an opportunity to hang tasteful pictures or paintings that give your home a touch of luxury. In the picture, the Venetian cladding represents a classic Italian fireplace with excellent features, where you can enjoy the warmth of a modern fireplace insert that draws inspiration from the fruits of Prometheus' sacrifice.

THE RUSTIC FIREPLACE SURROUNDS

The appeal of a rustic fireplace, besides the glowing beauty of the fire, lies in the use of natural materials. The warm colors typically convey a cozy feeling, and the wood and stone elements can be embellished with antique ornaments. The natural look of the rustic stones allows them to blend seamlessly into modern homes without being conspicuous. The appearance of rustic fireplaces is inspired by the traditions of centuries ago, when people used the treasures of nature as a guide when building them.
